(54) Title: METHOD FOR PREDICTIVE MAINTENANCE OF AN OPERATING COMPONENT OF AN AUTOMATIC MACHINE

(57) Abstract: A method for predictive maintenance of an operating component (3; 11) of an automatic machine, which method acquires at least two values (V), each relative to a respective characteristic quantity of the operating component (3; 11), compares each value (V) with a threshold value, and determines a specific defect and programs maintenance as a function of the comparison between the values (V) and the threshold values.
